Abstract: The fishfly species *Neochauliodes tonkinensis* (van der Weele, 1907) (Megaloptera: Corydalidae) is newly recorded from central Vietnam, province of Kon Tum.

Key words: Megaloptera, Corydalidae, *Neochauliodes*, faunistics, new record, Vietnam.

Resumen: *Neochauliodes tonkinensis* (van der Weele, 1907) nueva cita para Vietnam central (Megaloptera: Corydalidae). Se cita por primera vez de la provincia de Kon Tum, Vietnam central, el coridárido *Neochauliodes tonkinensis* (van der Weele, 1907) (Megaloptera: Corydalidae).

Palabras clave: Megaloptera, Corydalidae, *Neochauliodes*, faunística, nueva cita, Vietnam.

Aceptado: 23 de septiembre de 2016

The fishfly genus *Neochauliodes* van der Weele, 1909 which includes more than 40 species is the largest genus within the subfamily Chauliodinae, and is widely distributed in Oriental Asia, with a few records in eastern Palaearctic Asia (Letardi *et al.* 2012, Liu *et al.* 2010, 2016).

The species *Neochauliodes tonkinensis* (van der Weele, 1907) is known from China (Yunnan Prov.), Laos (Houaphan Prov.), Myanmar (Shan Stat.), Vietnam (Cao Bang Prov., Lao Cai Prov., Tuyen Quang Prov., Vinh Phu Prov.) (Letardi *et al.* 2012, Liu *et al.* 2010, 2016).

In the present note *Neochauliodes tonkinensis* is newly recorded from central Vietnam, in the province of Kon Tum.

Material examined: Vietnam, Kon Tum prov., Ngoc Linh Mt., 1900 m, 3/2016, native collector, 1 ex., Xingyue Liu det. 2016, J. Háva (Private Entomological Laboratory & Collection, Únětice u Prahy, Prague-west, Czech Republic).

Acknowledgements: I am very indebted to colleague Xingyue Liu (Beijing, China) for determination of the recorded species.
